Bangalore, India

Summary

Computer Science undergraduate at RIT Bangalore with hands-on experience in backend engineering, distributed systems, and real-world software development. Proven ability to design and build scalable systems, lead teams, and execute under pressure, with a research publication at ICDD'S '25 and recognition through IEEE IAMPro.

Education

Ramaiah Institute of Technology
B.E. Computer Science

Bangalore
2023 – 2027

Experience

Stealth Startup
Software Intern

Remote
May 2025 – July 2025

- Developed and deployed production-ready landing pages integrated with backend services and APIs for user acquisition and tracking.
- Automated internal workflows using n8n, reducing manual effort and improving operational efficiency.
- Built structured data pipelines for capturing, validating, and routing leads for analytics and business insights.

Projects

PeerNexus (Torrent Client) | [GitHub](#)
Java, Networking

- Built a BitTorrent-style peer-to-peer client enabling decentralized file sharing without centralized infrastructure.
- Implemented multithreaded socket communication to manage concurrent peer connections and efficient data transfer.
- Designed core protocol logic including piece scheduling, choking/unchoking, and integrity verification using hashing.

HALEM-PEGASIS Evaluator | [GitHub](#)
Java, Swing

- Proposed HALEM-PEGASIS, a hierarchical enhancement to improve routing efficiency in wireless sensor networks.
- Developed a simulation system to analyze network lifetime, node energy consumption, and routing performance.
- Achieved 35% reduction in routing overhead through optimized leader selection and adaptive topology handling.

Lumen (Course Platform) | [GitHub](#)
Node.js, MongoDB

- Designed and built a full-stack platform for course discovery, enrollment, and instructor management.
- Implemented secure authentication, role-based access control, and REST APIs for seamless system interaction.
- Optimized database queries and backend performance to support concurrent users with low latency.

Leadership

IEEE Computer Society, RIT
Chair

Bangalore
2025 – Present

- Led initiatives that increased active membership by 104.17% and improved overall community engagement.
- Organized and executed 11+ large-scale technical events with 1750+ participants.
- Managed a 98-member team across operations, sponsorships, and outreach.

IEEE Bangalore
IAMPro Intern

Bangalore
2025

- Completed a 6-month mentorship-driven internship focused on real-world problem solving and system development.
- Executed an end-to-end project lifecycle under guidance of industry mentors.
- Co-authored and published research paper at ICDD'S '25.

Achievements

- **Research Publication:** Published paper on Explainable CNN for lung disease classification at ICDD'S '25.
- **Gold Medalist (National Level):** Won gold medal in Taekwondo (2021), demonstrating discipline and competitive excellence.
- **Hackathon Participation:** Participated in Ghost Hackathon organized by FOSS United and Tech4Community, building a functional solution under time constraints.
- **Conference Presentation:** Presented research on automated legal text information extraction at ISAI-DT '24.

Skills

- **Languages:** Java, Python, JavaScript, SQL
- **Frameworks:** Spring Boot, React, Node.js, Express, Flask, Celery
- **Databases & Caching:** MongoDB, Redis
- **Tools:** Docker, Git, Maven, n8n
